2025 PFAS SEMINAR

dri

September 24-25, 2025 | Chicago, IL

PFAS litigation is moving forward, and the increase in claims and settlements reflects a mounting alarm over environmental and health effects. Whether you are involved in PFAS litigation or simply want to keep clients apprised of the latest developments, this seminar will provide an overview of where PFAS litigation and regulation stand and what is likely to come next.

What You Will Learn:

- Unique perspectives from experienced attorneys on the state of PFAS litigation, inside and outside of MDL.
- How scientists identify and quantitate PFAS through testing, including blood tests and their limitations.
- Insights on how PFAS regulation may change in the coming years.
- What you need to know about PFAS insurance considerations.

Expand Your Network By:

- Connecting with law firm and in-house thought leaders on PFAS litigation.
- Engaging with professionals from various sectors, including legal, manufacturing, retail, and others, to sharpen your perspective and build meaningful relationships.
- Participating in the networking reception and networking lunch.

Date: Wednesday, September 24 from 6:00–7:00 p.m.

Pricing: Free when you register for the seminar

Location: South Branch, 100 S Wacker Dr, Chicago, IL 60606

SESSIONS

Overview of PFAS Litigation: Federal and State Developments

PFAS litigation is exploding in state and federal courts across the country. Learn about the latest developments in the Aqueous Film Forming Foams (AFFF) MDL as well as litigation in other federal and state courts across the country.

What You Need to Know About Testing for PFAS in Products and the Environment for Litigation and Regulatory Compliance

We will explore issues with how scientists identify and quantitate PFAS in consumer products, waste streams, and environmental media, including the limitations and potential complications.

What Can You Expect from a PFAS Blood Test?

PFAS have been detected in the blood of many people in the U.S. What can these blood tests tell us and what are their limitations? What is the current state of the science connecting PFAS exposure to potential health effects?

Regulating PFAS in Products: Where Are We and Where Are We Going?

Manufacturers, importers, and retailers are all facing a rapidly evolving set of disclosure requirements and bans for products that contain PFAS. Hear lessons learned in early-adopting states, with a look ahead to the likely landscape of state and federal regulatory requirements.

Insurance for PFAS Claims

This session will cover new PFAS exclusions introduced by individual insurers and ISO, as well as case law addressing the application of pollution exclusions to PFAS claims, and more.
